

Water Is "The Liquid of Life" — Have Copious Amounts of Safe Clean Water, or Suffer in Just Hours

- *A Self-Reliant Family is the Key to a Future Without Fear*
- *You Will Either Make Provisions for the Future, or Become a Victim*

## **The Law of Provident Living**

- This is the Foundation (Principle) Law for Life.  
All that Follows Flows from this Principle.

1. **S**\_\_\_\_\_ (Spiritual) - There is much more to you than meets the eye
2. **A**\_\_\_\_\_ (Attitude) - Will determine if you live or die when things are really bad
3. **K**\_\_\_\_\_ (Knowledge) - Is how you get the right attitude plus the things you need
4. **S**\_\_\_\_\_ (Stuff) - Important, but the other three must come first

## **The Law of Stewardship**

- This is How It Works, Whether You Like it or Not.

1. **A**\_\_\_\_\_ (Authority) - The Right to Act is Accepted from One Who Has the Power to Grant It
2. **R**\_\_\_\_\_ (Responsibility) - Accepting the Assignment to Act Within the Bounds of Granted Authority
3. **A**\_\_\_\_\_ (Accountability) - The Just and Appropriate "Rewards" for Actions Taken (Not Taken)

## **The Nine Core Modules**

- Getting your head around all the things you need to: LEARN, DO & HAVE (maximize the value of your time and money)

1. **F**\_\_\_\_\_ (Foundation) - Unchanging Principles
2. **C**\_\_\_\_\_ (Clothing) - Personal Portable Shelter
3. **W**\_\_\_\_\_ (Water) - The Liquid of Life
4. **S**\_\_\_\_\_ (Sanitation) - The Hidden Disaster
5. **N**\_\_\_\_\_ (Nutrition) - Eat and Drink for Health
6. **S**\_\_\_\_\_ (Shelter) - There's Value To Coming Inside
7. **W**\_\_\_\_\_ (Wellness) - Vitality of Body, Mind, and Spirit
8. **T**\_\_\_\_\_ (Tools) - To Repair, Maintain, and Create
9. **S**\_\_\_\_\_ (Supplies) - Used, Consumed, and Replenished

## **Water**

- "The Liquid of Life" that is so common and has been so available that most people think little about it.

- Water is the foundation of all life on earth.
- Water enables all body and inter-cellular function, all chemical and electrical activities and processes; it also carries and flushes toxins and waste from each cell and body system.
- Maintaining proper hydration is critical for physical and mental performance.
- Dehydration is very stressful and dangerous, especially in emergency and survival situations.

- In developed countries (like the USA) safe clean water has been a way of life for decades.
- Municipalities go to great depth, distance, and expense to start the process with relatively clean water, which may then be processed through six stages consisting of 16 or more distinct steps in order to make sure that they reliably deliver safe water.

## Issues

- Failure to address issues will cause results you do not want. Preparation will determine your future outcome.

- Without an abundant supply of safe water, suffering comes quickly and death can follow soon.
- Making safe water from highly contaminated water is considerably more challenging than the preparedness industry will usually lead you to believe.
- When things really break down, it will be up to you. Rescue may not be on the way, your actions and preparation now will determine your outcome. After all, it's about your stewardships.
- During disasters, normal and critical services are not available due to loss of a functioning infrastructure, loss of support and operations personnel, loss of power, water, communications, transportation, fuels, or delivery of needed equipment, supplies, and parts, etc.
- Gratefully, in the U.S., we have little experience with widespread breakdowns of safe water delivery. However, this means that most people are not prepared to deal with a breakdown.
- The people of Haiti were better prepared than our people are. Should the U.S. have a "Haiti" level of event, disease and death from unsanitary water will be worse for us than it is for them!
- Water is necessary in three vital areas: Consumption, Sanitation, Food Production (plants & animals).
- For emergency water you must: (1) Store plenty of potable water, (2) Know where and how to find more, (3) Be 100% sure that you know how to purify the worst kind of raw water, (4) Keep yourself and your surroundings clean and sanitary.

## Areas You Must Address

- You cannot skip any of these, and you have to get it right for as long as necessary

***The Truth About Life:*** There is no doubt that tomorrow will come, and there is no dispute that *things* happen, but how you are prepared to meet tomorrow will make all the difference in the world. If you are prepared for the worst, then no matter what happens, it will be an adventure. *Jim Phillips*
